

KNITCO FASHIONNS

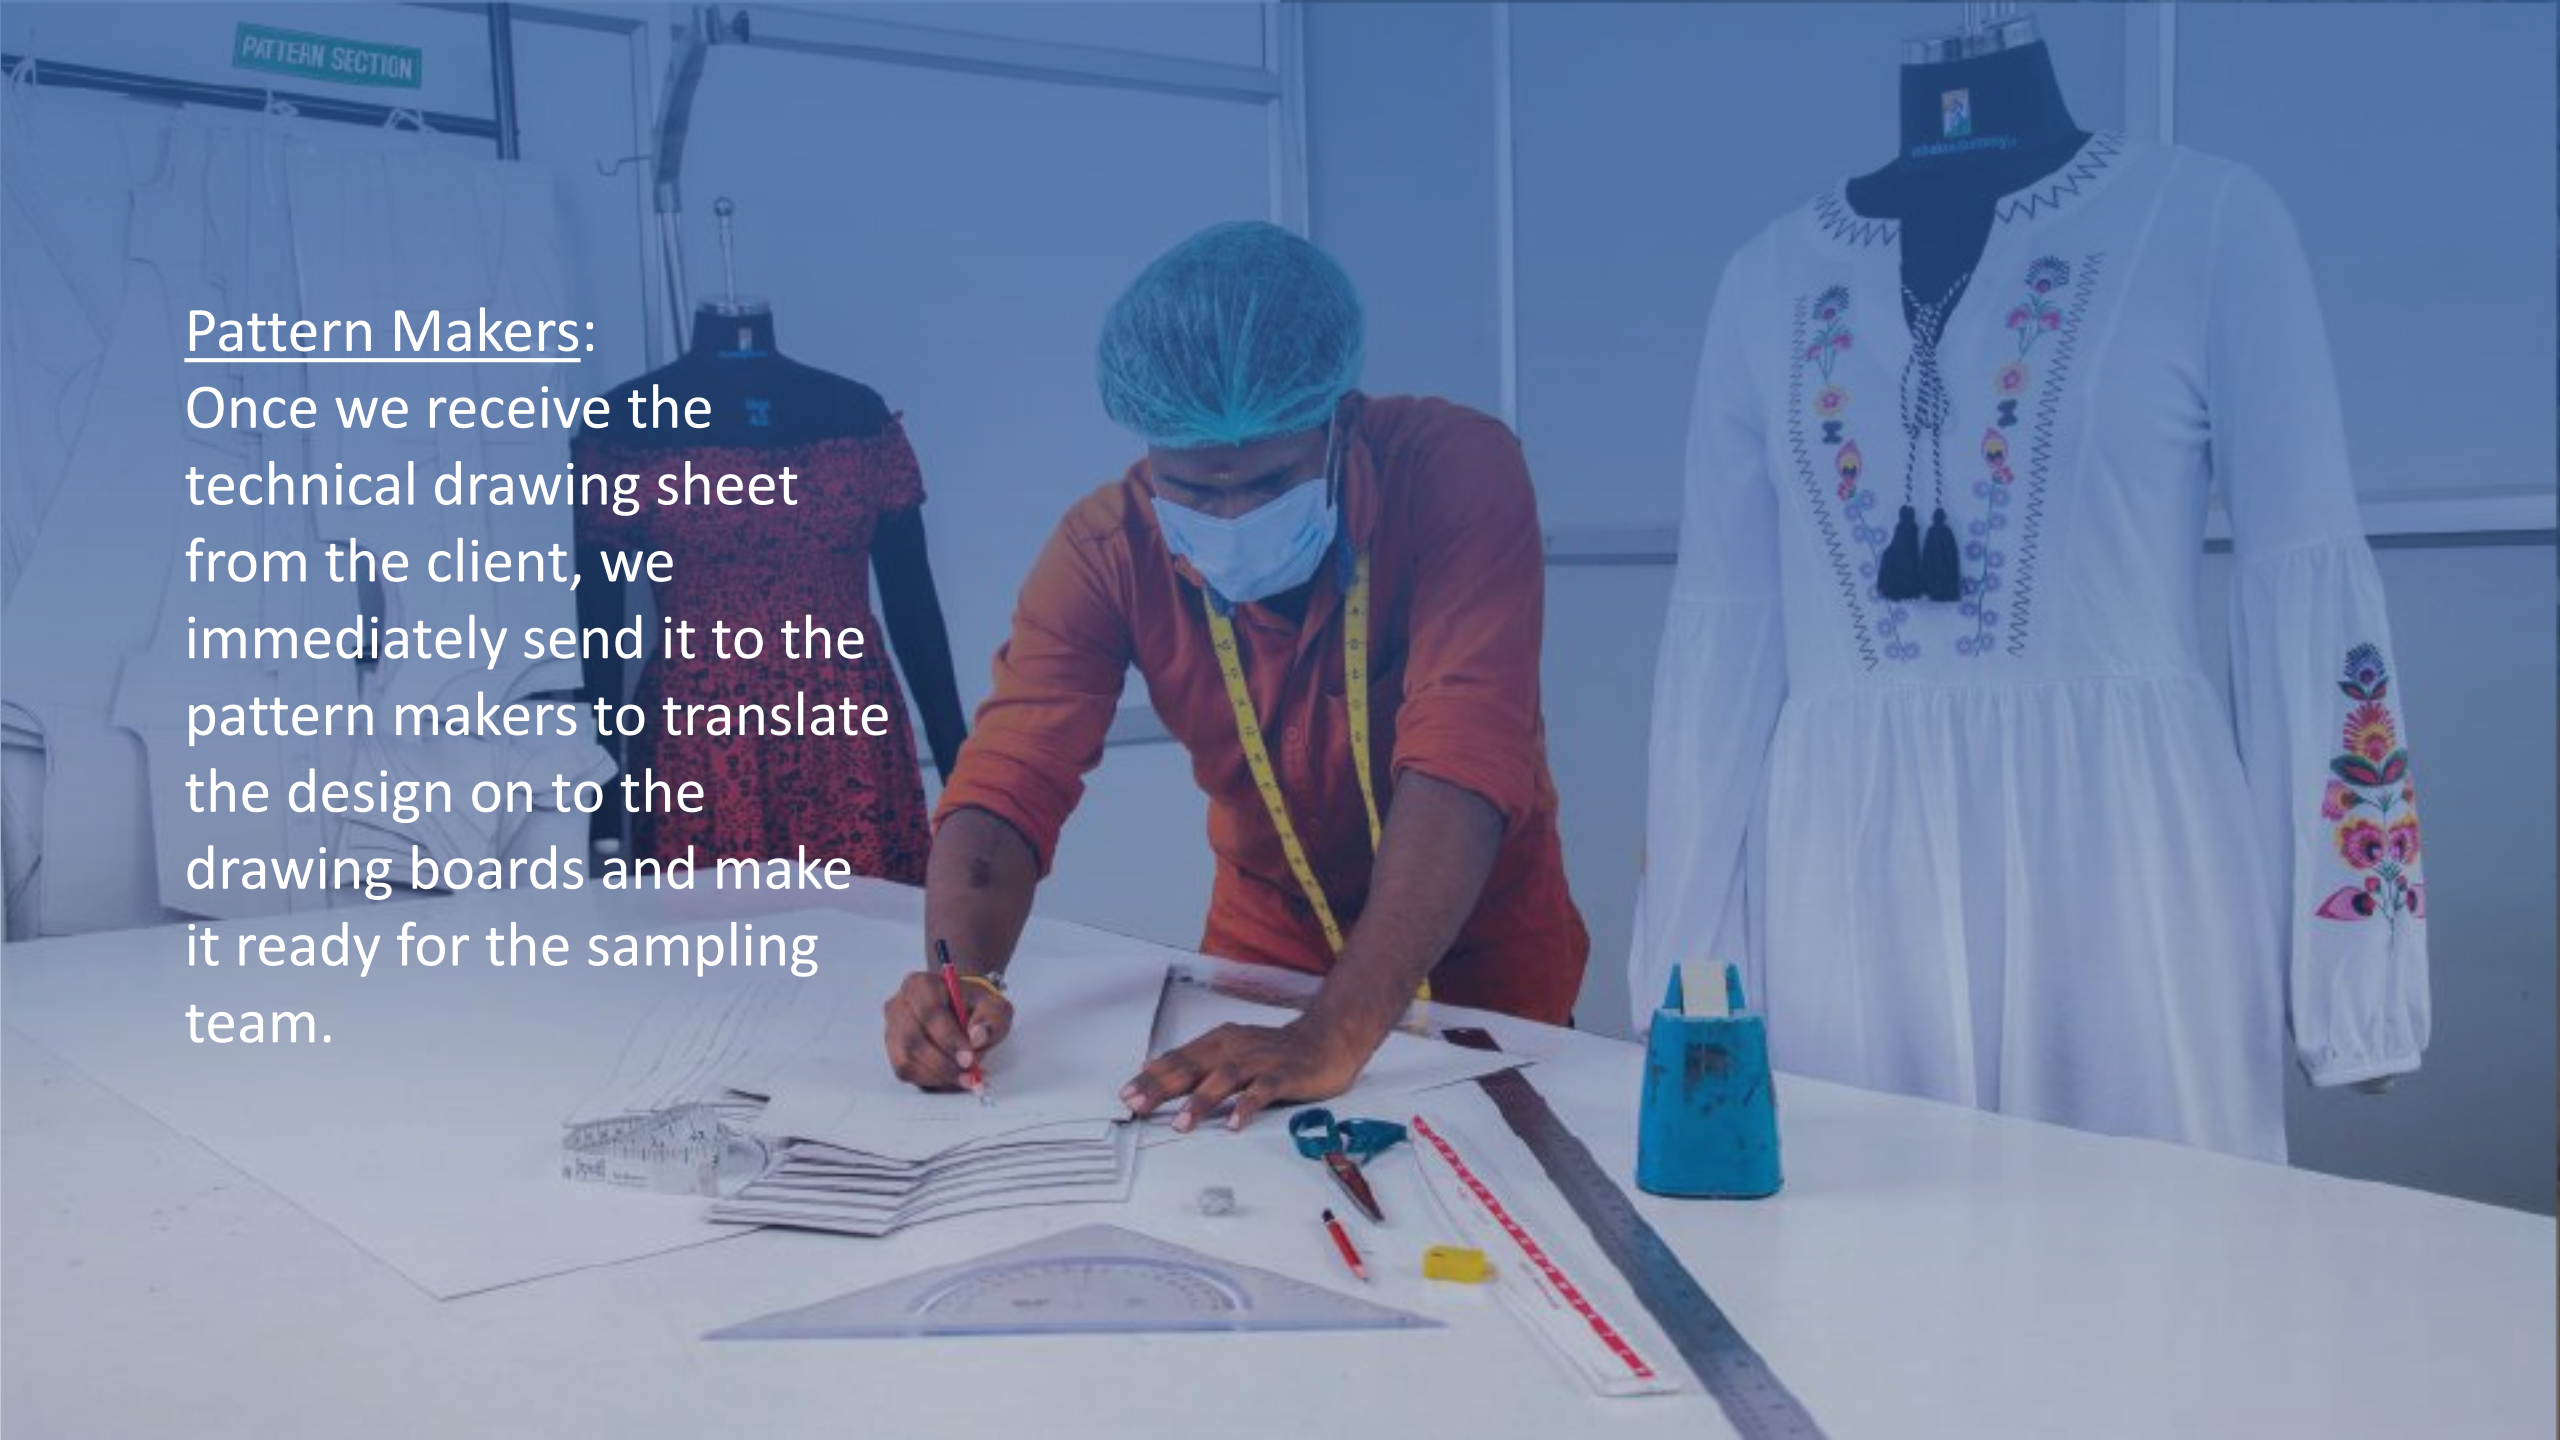

KNITTED GARMENTS MANUFACTURING COMPANY
SMALL & MEDIUM SCALE EXPORTERS

Introduction:

- We at Knitco Fashionns are well equipped with over 300 machines spread over a floor area of 40000 square feet
- We have an exclusive 10 machines sampling department
- We have a factory strength of 400 workers

Pattern Makers:

Once we receive the technical drawing sheet from the client, we immediately send it to the pattern makers to translate the design on to the drawing boards and make it ready for the sampling team.

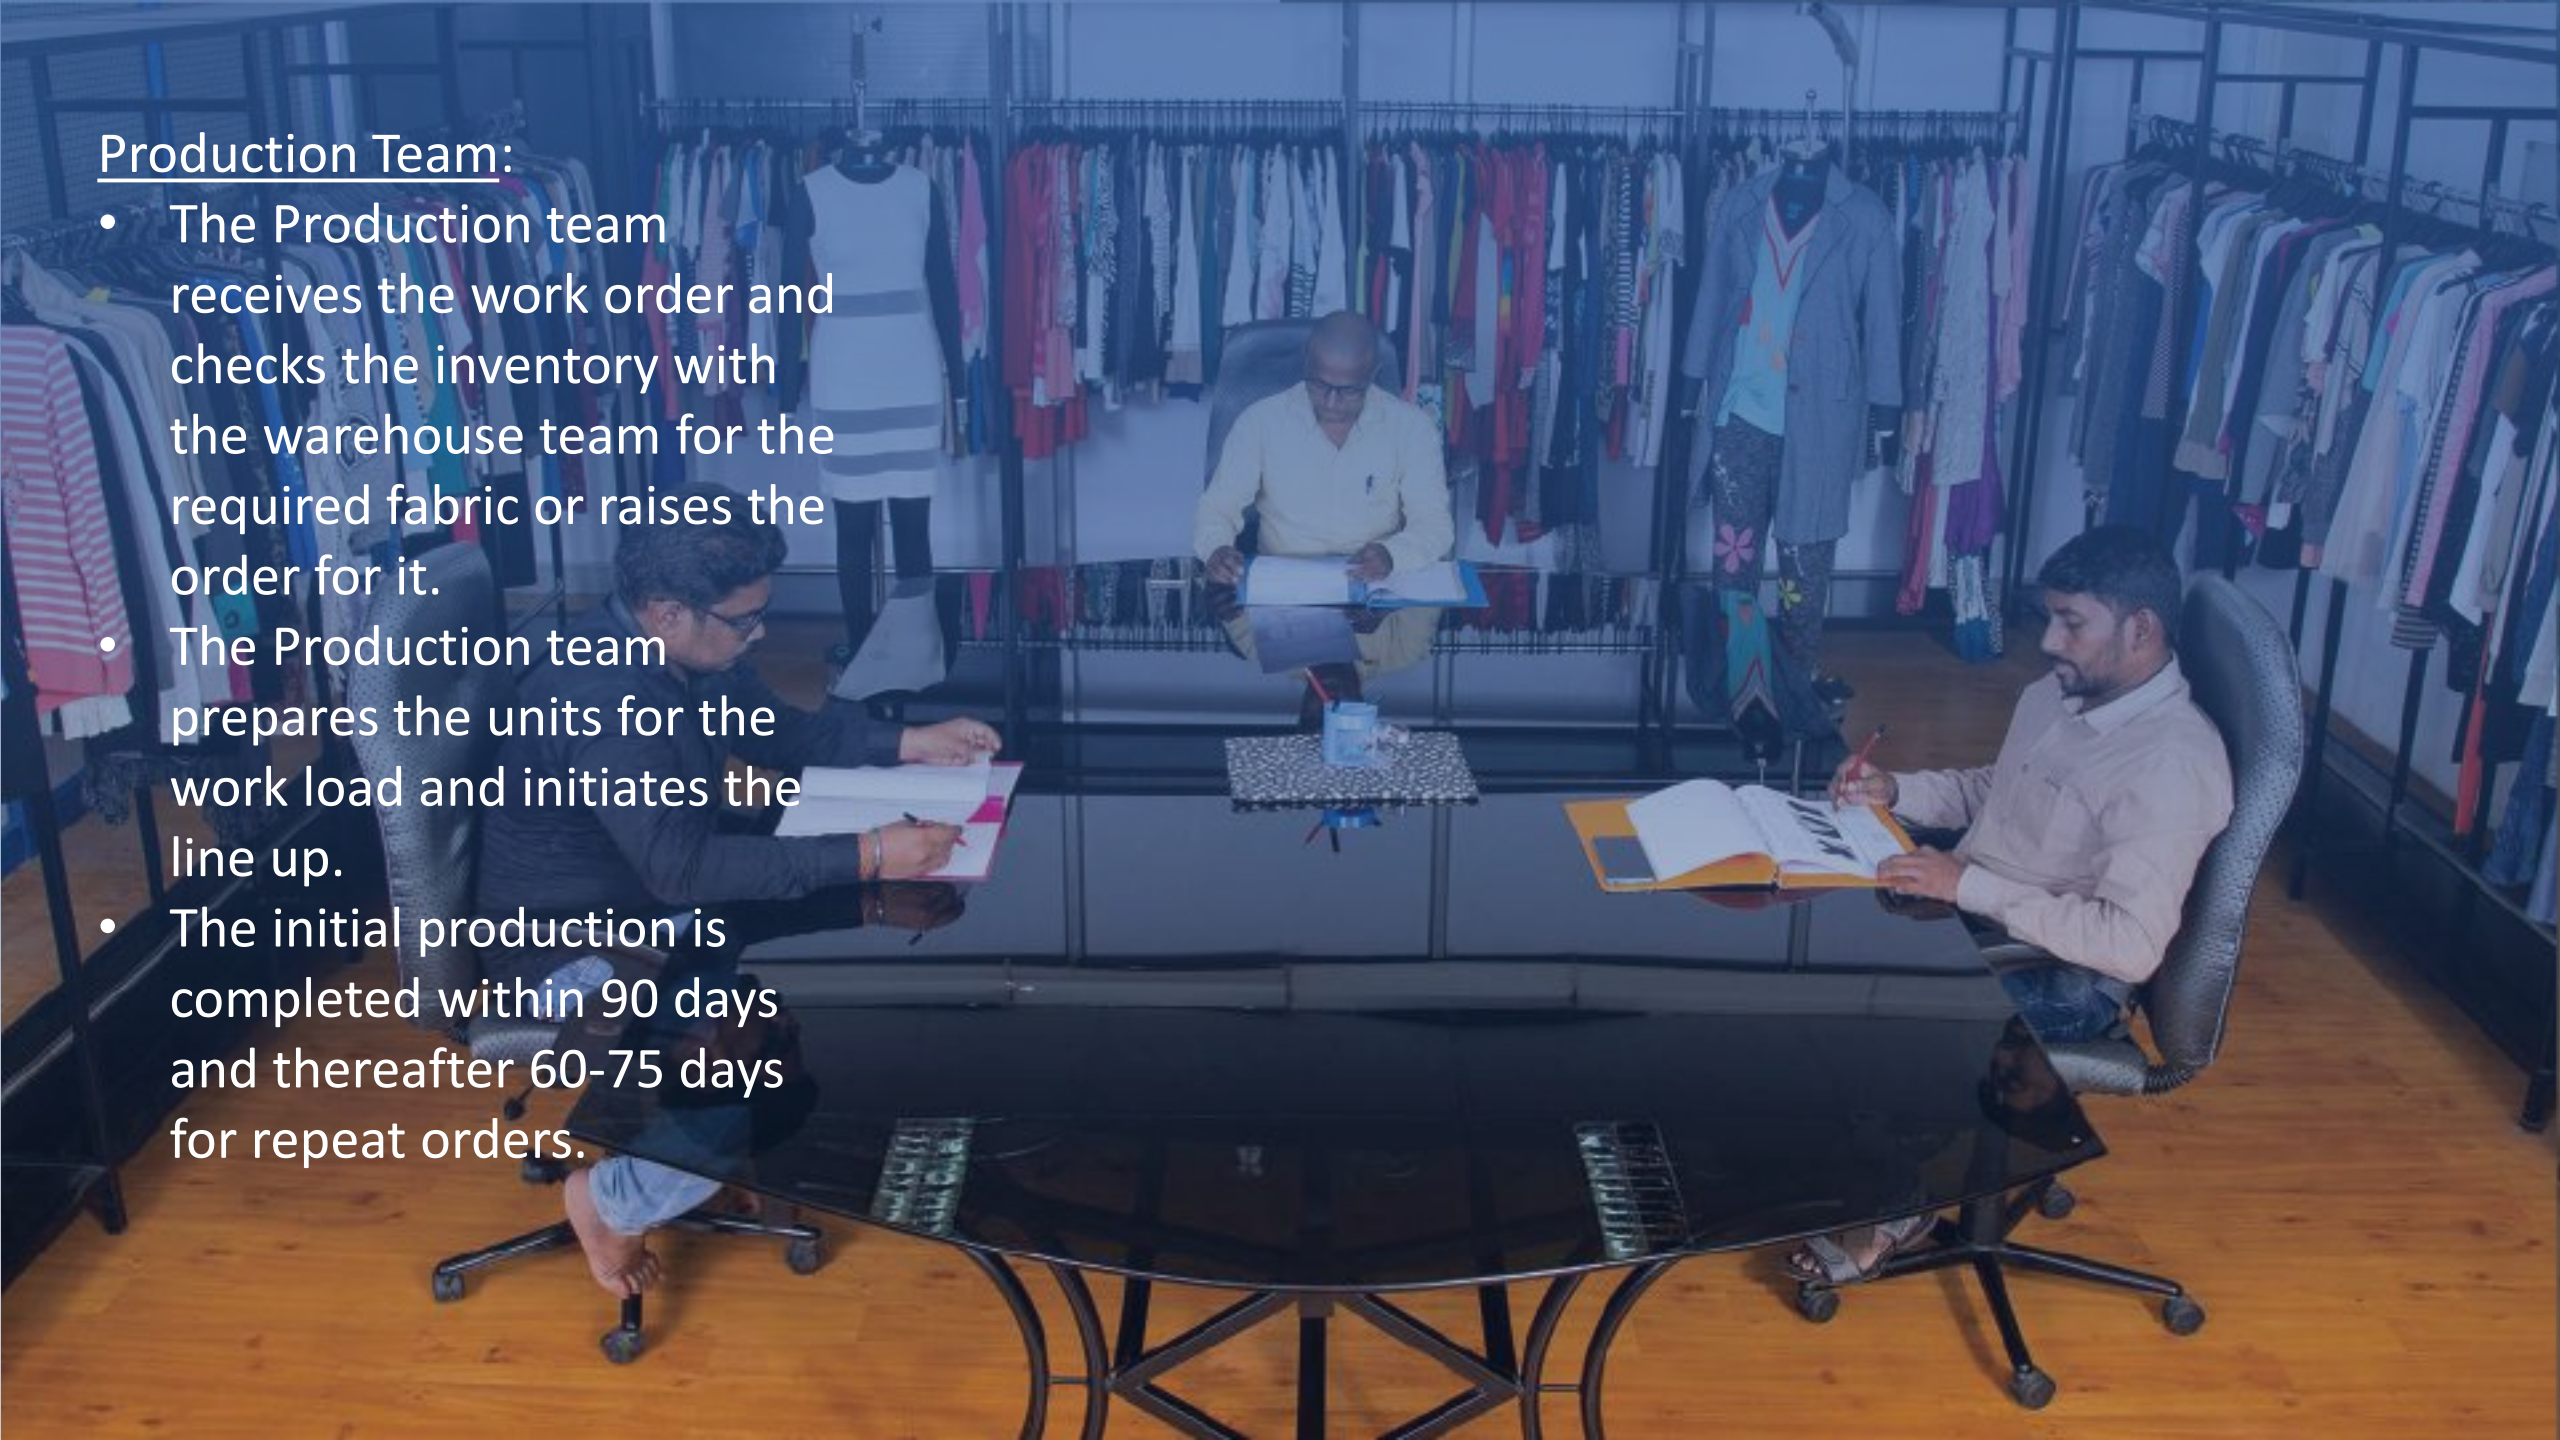

Sampling Team:

- The sampling team receives the pattern board and starts gathering the fabric required from the ware house and initiates cutting and stitching of the garments.
- The sampling team takes 2-4 weeks (depending on the style and design) to get the garments ready for dispatch
- If there is any feedback from the client, the changes are again incorporated by the sampling team and the samples are dispatched to the client

Production Team:

- The Production team receives the work order and checks the inventory with the warehouse team for the required fabric or raises the order for it.
- The Production team prepares the units for the work load and initiates the line up.
- The initial production is completed within 90 days and thereafter 60-75 days for repeat orders.

Warehouse:

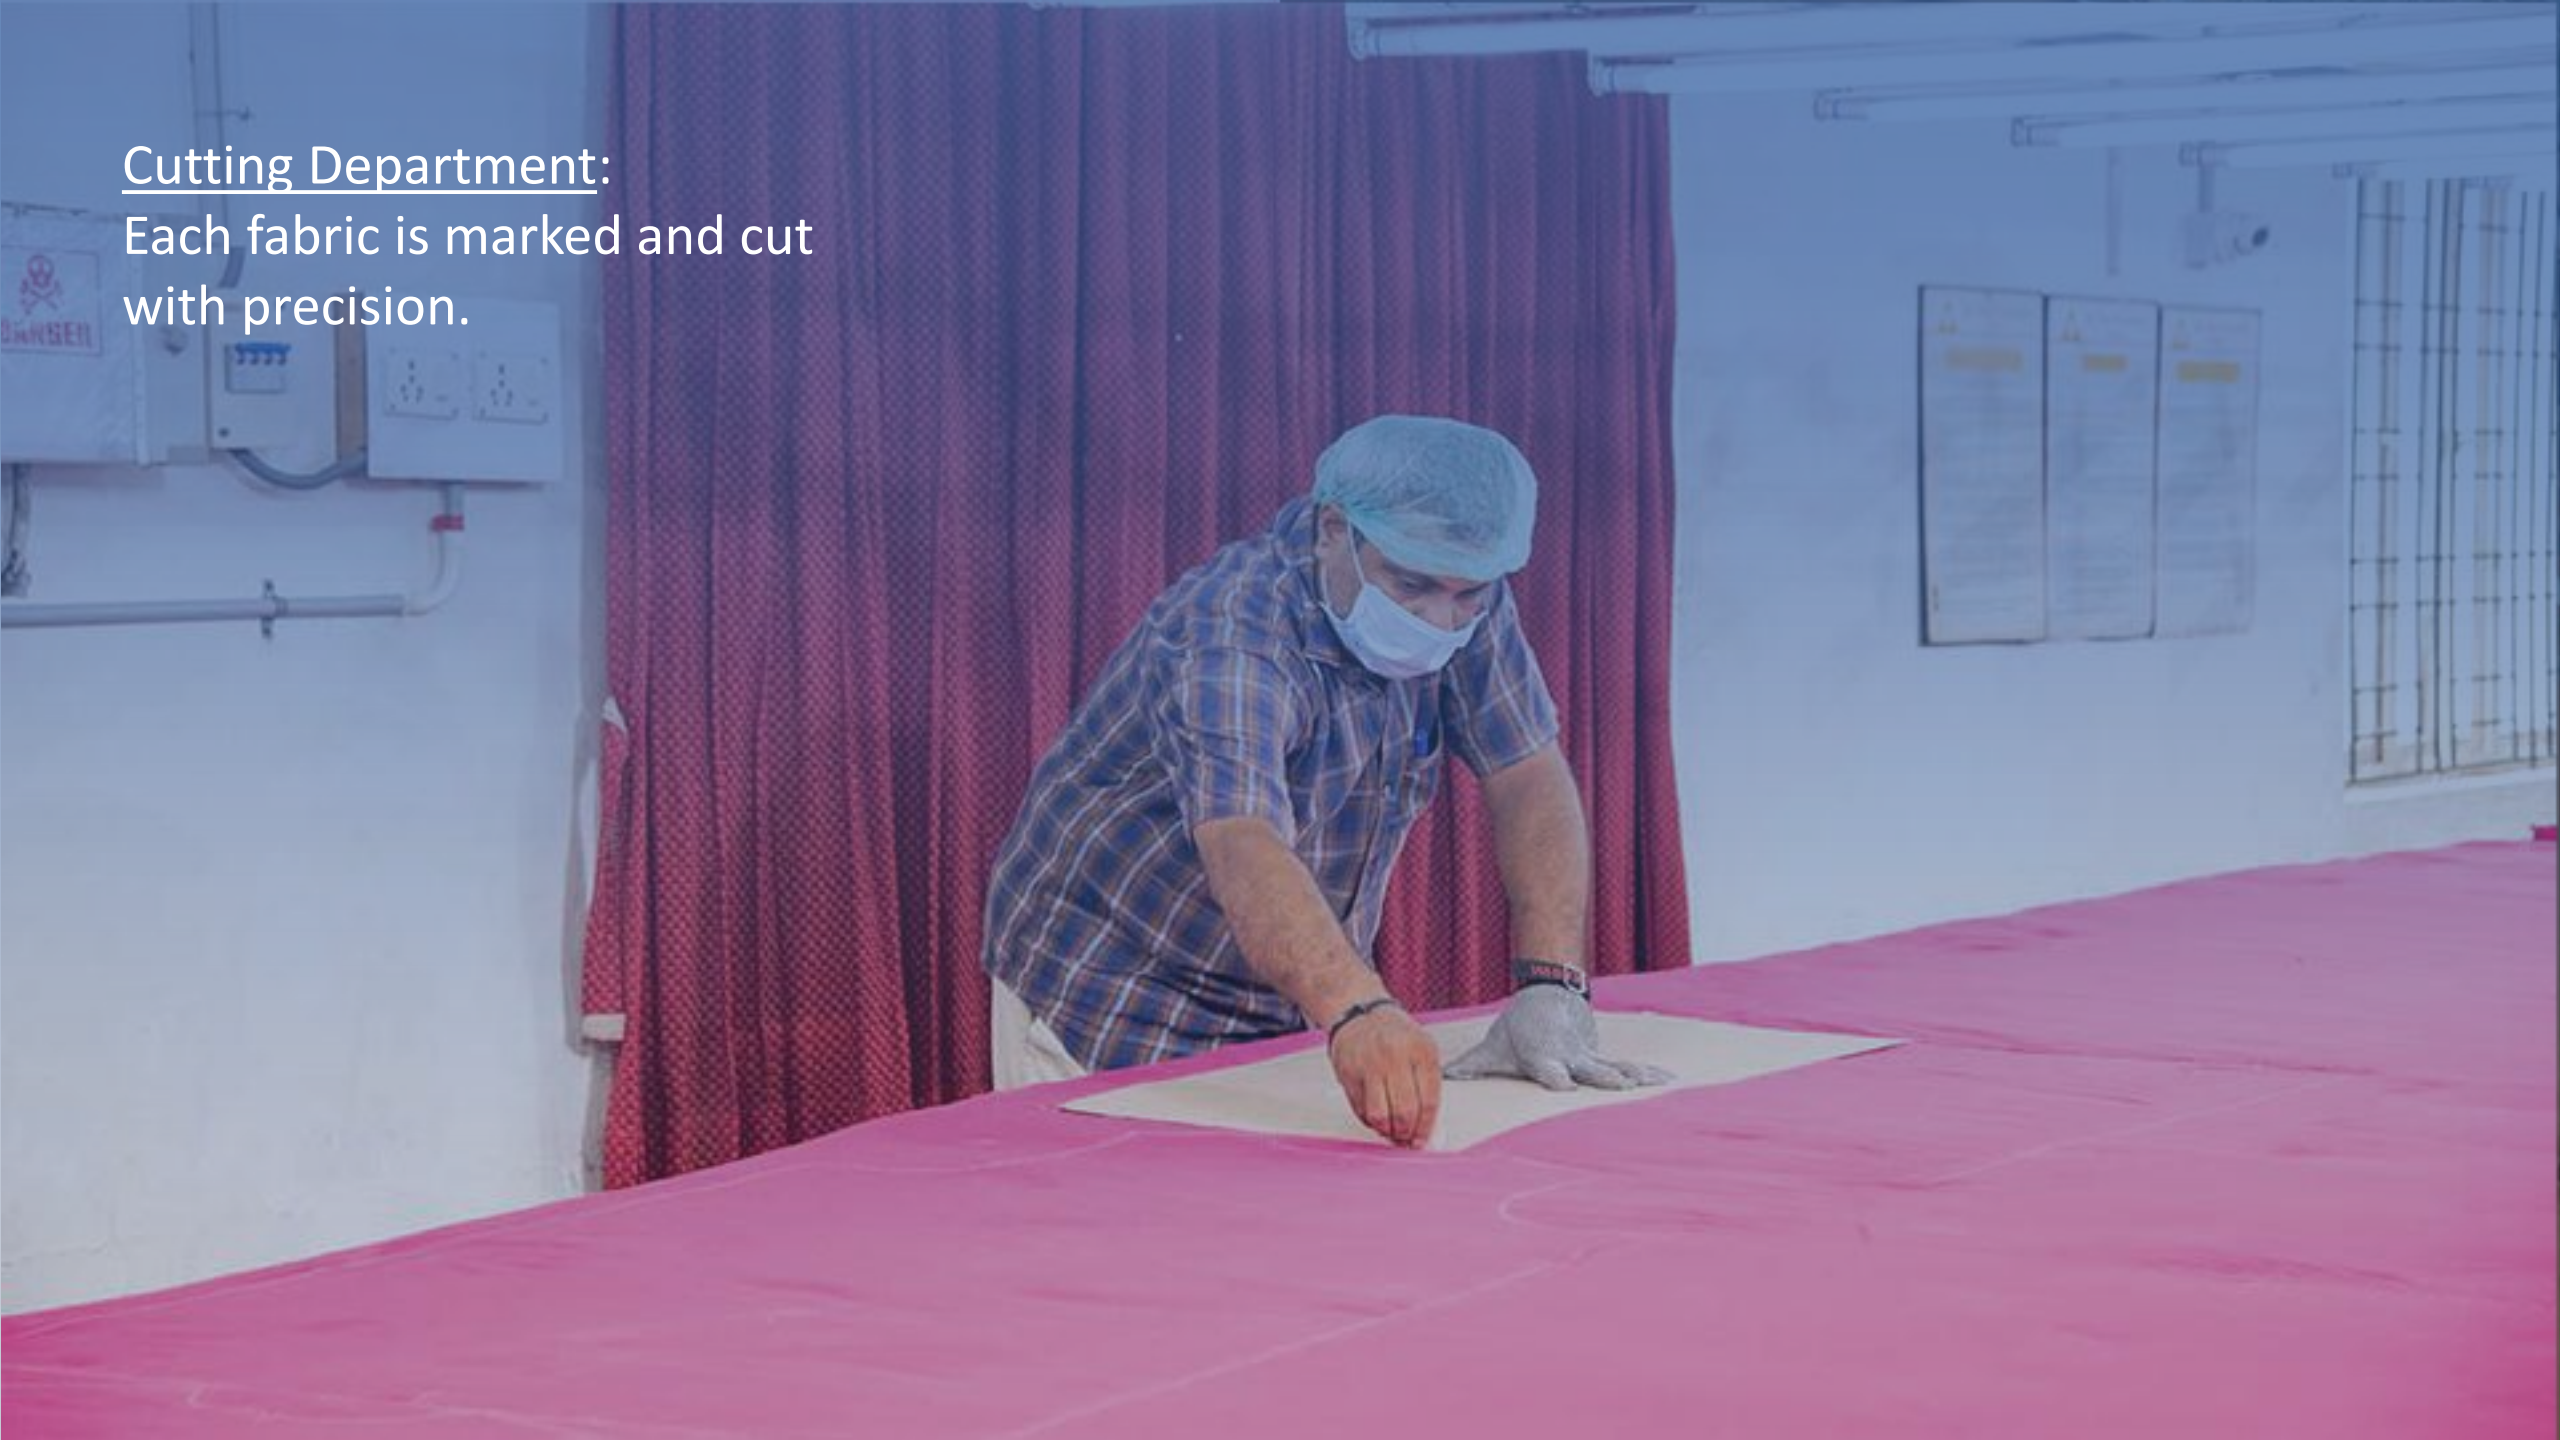

Our warehouse is neatly stacked up with an up to date inventory of available yarn and fabric

We are ready to accept new work orders throughout the year

Cutting Department:

Each fabric is marked and cut with precision.

Band Knife:

Trimmed for the edgy cuts
and comfortable fits.

Stitching Unit:
Stitching to suit the
need of our clients.

Each and every stitched garment is checked in detail for the best finish and output

CHECKING SECTION

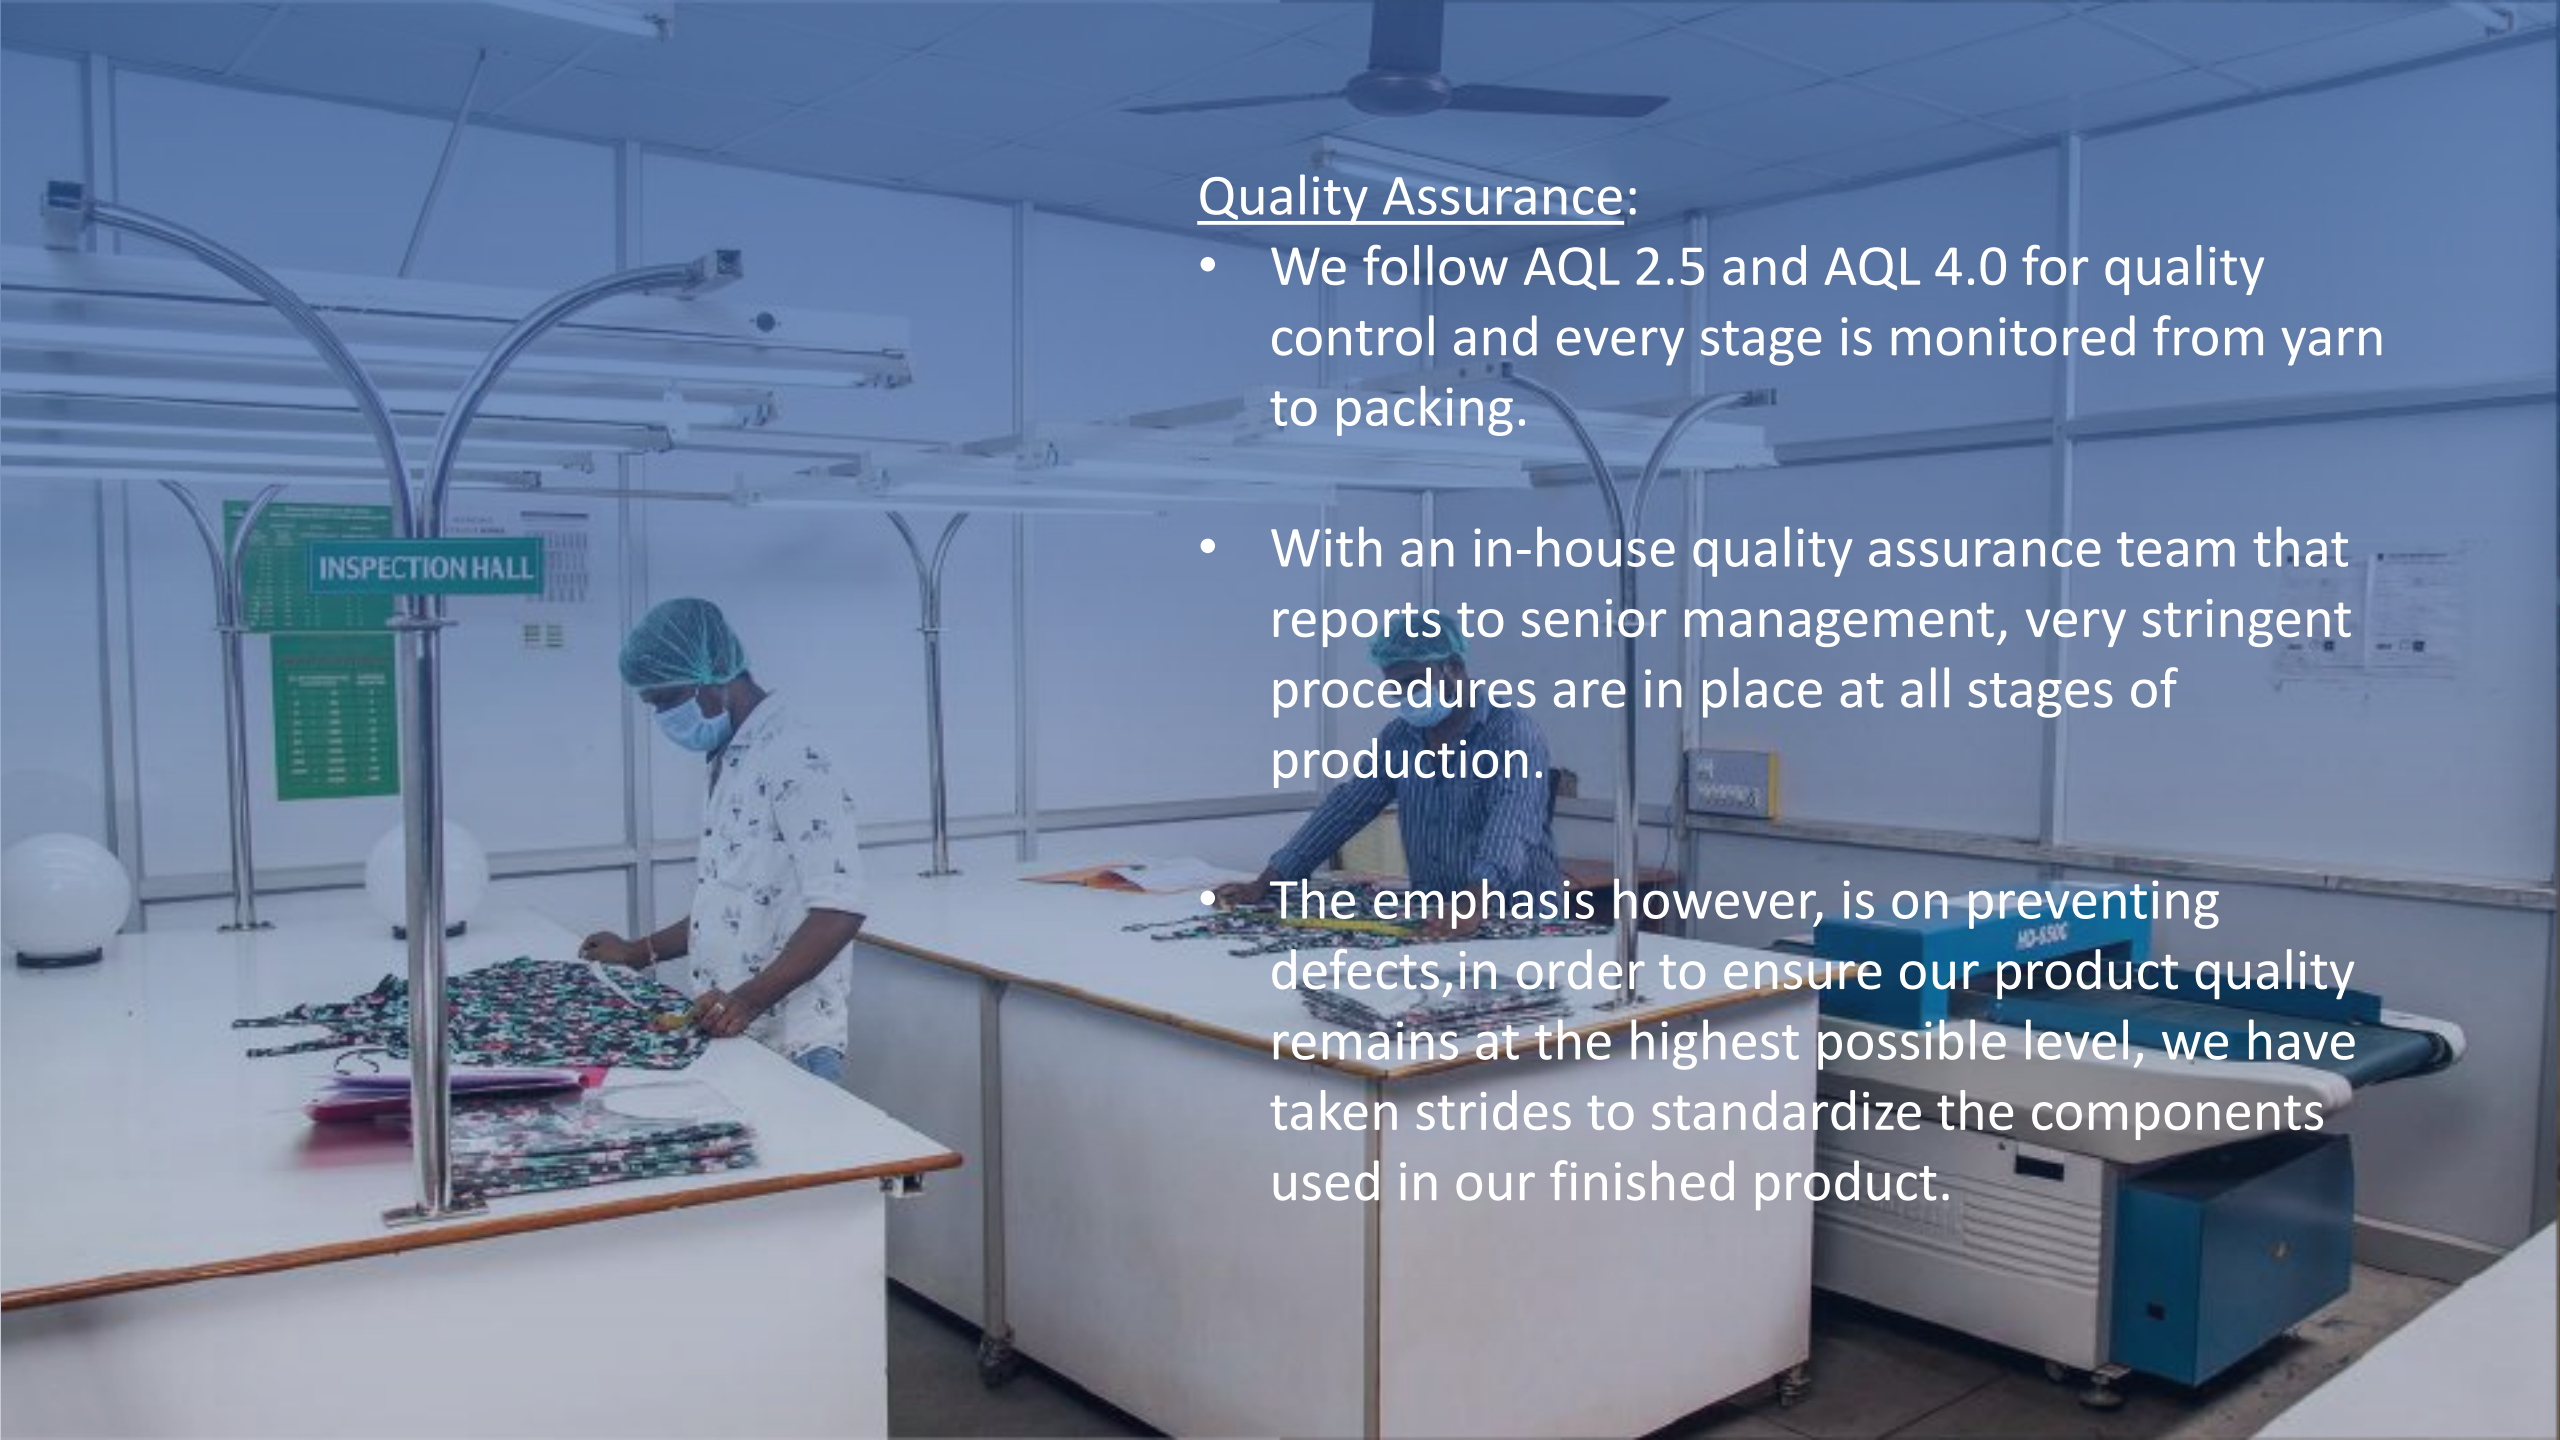

All garments are neatly pressed and packed.

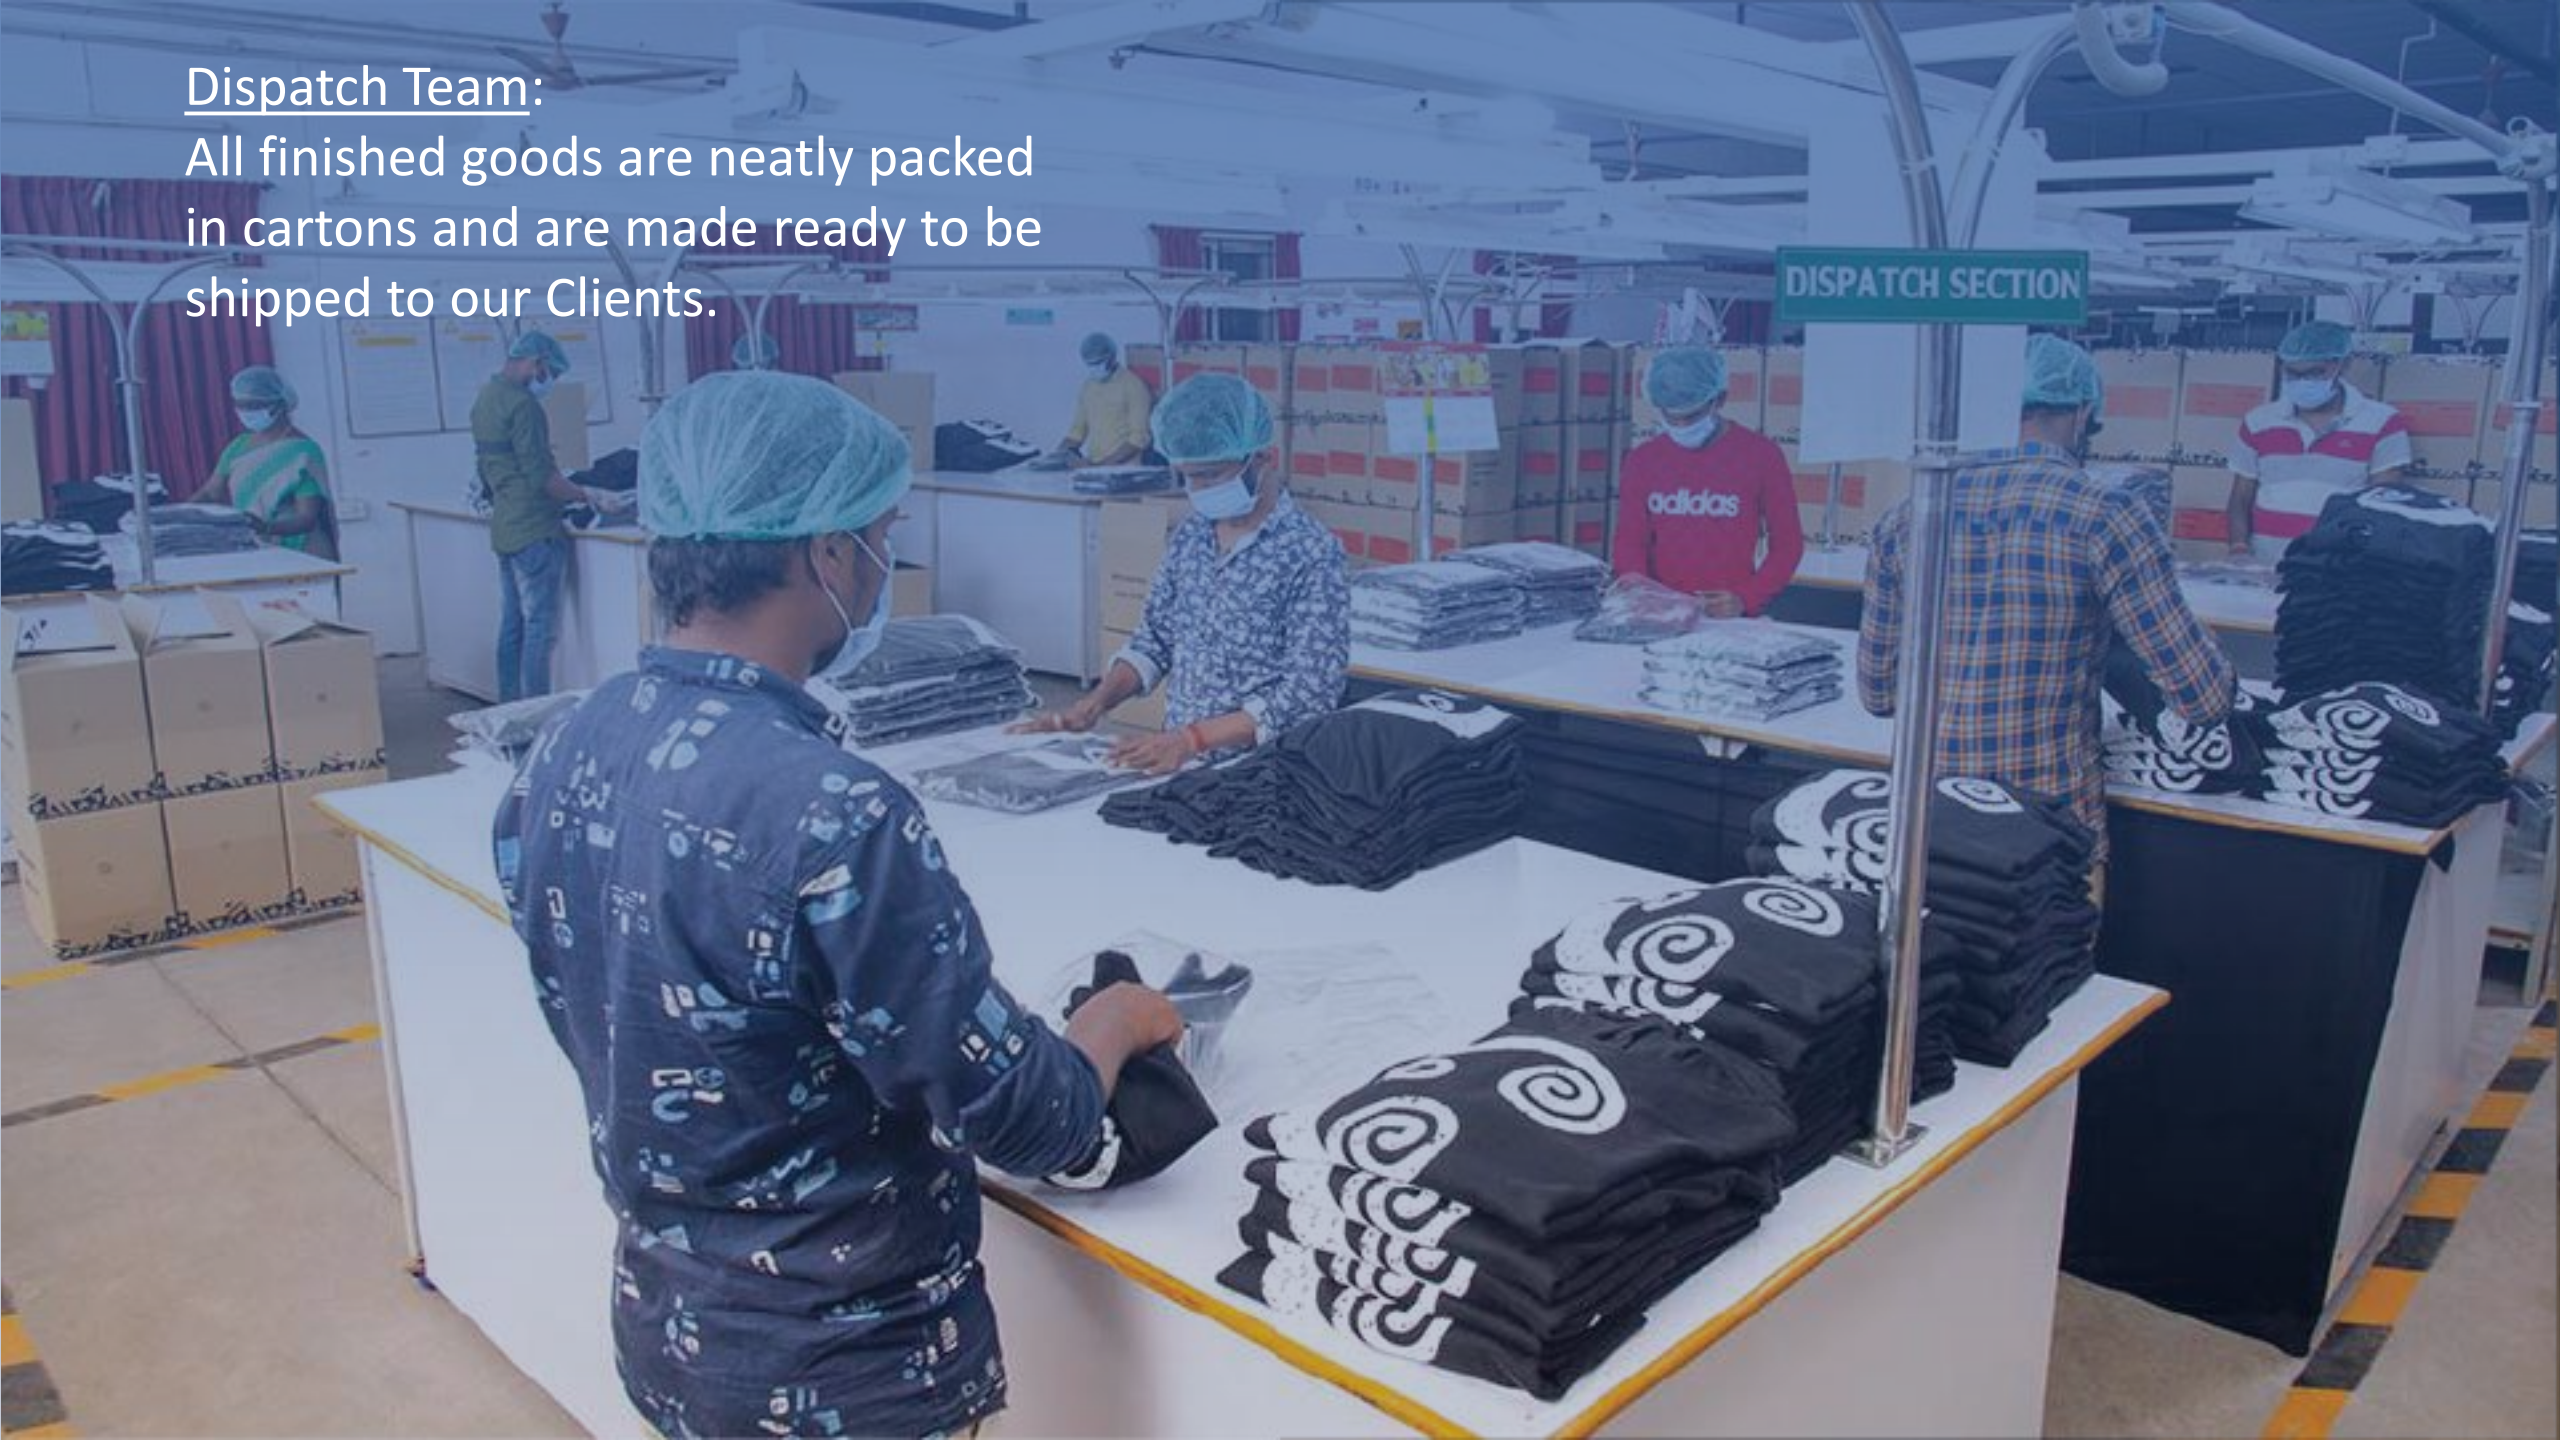

Quality Assurance:

- We follow AQL 2.5 and AQL 4.0 for quality control and every stage is monitored from yarn to packing.
- With an in-house quality assurance team that reports to senior management, very stringent procedures are in place at all stages of production.
- The emphasis however, is on preventing defects, in order to ensure our product quality remains at the highest possible level, we have taken strides to standardize the components used in our finished product.

Dispatch Team:

All finished goods are neatly packed in cartons and are made ready to be shipped to our Clients.
